EXPERIENCE

ALTRES, Honolulu, HI — *Java Web Developer*

OCTOBER 2017 - FEBRUARY 2018

+ Developed a feature using Java, JSTL, and Java Servlets that allows users to import/export Excel documents to track employee costing rates and update any changes in the database
+ Created and updated front end features utilizing JSTL, jQuery, and Javascript
+ Tested existing software features and functions using PowerMock/EasyMock
+ Worked on a team that follows agile software development methodologies

PROJECTS

Table for Two

+ Designed a React Native application for the 2018 AT&T Hackathon that connects two users based on restaurant interests and current location
+ Created a simple and efficient user experience by planning out the application flow through wireframes and focusing on a minimalistic design

FreeCodeCamp — *Front-End Development Certification*

+ Developed several front-end projects utilizing HTML5/CSS3, Javascript, jQuery, Bootstrap, CSS animations, and various APIs
+ Designed each project to utilize a straightforward and minimalistic UI/UX

Help Your City!

+ Developed a full-stack web application in a team to connect people quickly during natural disasters without the user needing to communicate to emergency services
+ Responsible for the design of the application while managing and delegating tasks to the team
+ Utilized React, Redux, PostgreSQL, Express, JWT, Twilio, Sequelize

EDUCATION

Devleague, Honolulu, HI — *Javascript Web Engineering*

MAY 2017 - NOVEMBER 2017

+ Completed over 800 hours in an intensive coding boot camp focused on learning and utilizing modern web development languages and best practices for developing applications built for both mobile and web platforms
+ Participated in team for the 2017 AngelHack Global Hackathon to create Alexa skills for pet owners and designed a landing page for the product

University of Hawaii at Manoa, Honolulu, HI — *Bachelors of Arts in Computer Science + Certificate in Japanese Language*

FALL 2011 - SPRING 2017
